Usage

The printer is setup on the local network. Users should configure their computer to access the network wirelessly, or using an available Ethernet connection. The proper driver for the operating system needs to be installed, and the printer can be found at 192.168.5.17

Getting Drivers

- Generally speaking we use the **Postscript** drivers instead of the PCL drivers.
- Once you get the driver, you need to install it, and also configure the user accounting.

Mac OSX 10.6 Snow Leopard

Click any image to see the full-size screenshot (Ctrl+click to open in a new tab)

1. Click here to go to http://onyxftp.mykonicaminolta.com/download/Search.aspx

Click here to go to http://onyxftp.mykonicaminolta.com/download/Search.aspx

2. under "Product Group", click Color Products

- 3. under "Product" scroll to and click bizhub C253
- 4. under "File Type" click on Drivers

- 5. under "OS" click on the appropriate Operating System (e.g. Mac OS 10.6.x for Snow Leopard)
- 6. click the **Show** button
- 7. click on the link (http://onyxftp.mykonicaminolta.com/DownloadFile/Download.ashx? fileid=19102&productid=1021) to download the driver installer (KONICAMINOLTA_C353Series_106.pkg). (http://onyxftp.mykonicaminolta.com/DownloadFile/Download.ashx?fileid=19102&productid=1021) In Mac, this will end up in the "Downloads" folder.
- 8. open finder and navigate to "Downloads", click the zip file and it will autounzip
- 9. click the pkg file, and it will launch the installer wizard ^[1]
- 10. accept all the prompts, (NB: you may need to enter your System user password to authorize installation of the driver)
- 11. you will see the "success" screen upon completing the driver installation

you will see the "success" screen upon completing the driver installation

12. click on the apple menu icon (top left) and "system preferences"
